

Company Profile

AECOM is a global provider of professional technical and management support services to a broad range of markets, including transportation, facilities, environmental, energy, water and government. With approximately 45,000 employees around the world, AECOM is a leader in all of the key markets that it serves. AECOM provides a blend of global reach, local knowledge, innovation and technical excellence in delivering solutions that create, enhance and sustain the world's built, natural, and social environments. A Fortune 500 company, AECOM serves clients in more than 140 countries and had revenue of \$8.2 billion during the 12 months ended Dec. 31, 2012. More information on AECOM and its services can be found at www.aecom.com. Follow AECOM on Twitter at @AECOM.

In Canada, AECOM has more than 4,000 employees and services the Transportation, Water, Environment and Design markets.

Our Manitoba District team consists of nearly 230 professional engineers, landscape architects, technicians, technologists, surveyors, geotechnical, inspectors, CAD persons, office staff and technical and administrative staff, who take a comprehensive strategic approach to identifying, understanding and addressing the issues that most concern our clients.

AECOM's Manitoba office has been in operation in Manitoba dating back as far as 1954.

Living in harmony with the environment demands that we become aware of the influence we have on the world around us. At AECOM's Manitoba office, we balance the tradeoffs between social, environmental and economic considerations, managing risk and creating strategies that lead to sustainable solutions for our clients and the communities they affect. The results are solutions that are practical, cost-effective and socially acceptable.

Our corporate philosophy demands the thorough integration of engineering and scientific disciplines. Manitoba's multidisciplinary team approach is organized around the project. We assemble the best team available for a specific project, to ensure a comprehensive approach to problem solving. AECOM's Manitoba staff are passionate about their work and are the best at what they do. Many of our Manitoba staff are involved in world class projects spanning North America and around the globe. In addition to our local understanding and presence, AECOM's Manitoba office has access to world class technical and project management skills, providing our clients with value added services. Our ability to mobilize best practices and superior project teams provides AECOM's Manitoba office the opportunity to work with unique clients with diverse requirements, delivering both small and large scale projects.

AECOM Services

Water

Our Water business line includes services in water and wastewater engineering, water resources, municipal engineering and community infrastructure.

Environment

Our Environment business line provides world class capabilities and experience in environmental engineering, geotechnical engineering and environmental sciences.

Transportation

Our Manitoba Transportation business line focuses on feasibility studies, transportation planning, condition assessments, conceptual, functional, preliminary and detailed design and construction administration/management for a variety of transportation infrastructure.

Buildings and Places

Our Design business line provides quality program/project management and multidiscipline services for traditional project delivery, design/build and construction management projects. We work with our clients from the beginning of project programming/planning to commissioning and start up in the following disciplines: mechanical, electrical, structural, instrumentation and controls, architectural, construction administration/management and program/project management. Our design philosophy encourages the use of sustainable design principles, as provided by our LEED-Accredited personnel.
