

Powering progress, safely and sustainably

At Hatch, whatever our clients envision, our engineers can design and build. We respond quickly with solutions that are smarter, more efficient, and innovative. We draw upon our 9,000 staff with experience in over 150 countries to challenge the status quo and create positive change for our clients, our employees, and the communities we serve.

As an employee-owned, multidisciplinary professional services firm, we deliver a comprehensive array of technical and strategic services, including consulting, information technology, engineering, process development, and project and construction management to the Energy, Mining, and Infrastructure sectors.

Global presence, local focus

Hatch's Winnipeg office was established in 1965 and has provided consulting expertise to numerous government agencies, power utilities, and industrial clients, both within the mid-Canada region, as well as internationally.

The office has extensive local experience in the design, construction supervision and management of flood protection infrastructure, water treatment and conveyance structures, dams, hydropower facilities, HVDC, transmission facilities, mining, food processing, and infrastructure including highways, bridges, rail & transit.

The time is now. Let's create positive change together.
