2018 Awards of Excellence – Sponsorship Opportunities

Join us in celebration 40 years of ACEC in Manitoba!

The Manitoba Awards of Excellence in Consulting Engineering serves to foster and promote the provision of exceptional product and service locally, nationally and internationally.

Collectively, these projects showcase the diverse range of skills and expertise possessed by Manitoba's consulting engineering firms. The work of engineers, whether it is high profile or behind the scenes, impact almost every aspect of our lives.

The Association of Consulting Engineering Companies of Manitoba (ACEC-MB) formed in 1978 and is now celebrating 40 years of the association. We are a non-profit organization dedicated to improving the Manitoba business environment for consulting engineering firms and their clients. The consulting engineering industry in Manitoba generates over \$150 million of direct economic activity in Manitoba and our design work represents a further construction value in the range of \$2 billion. Currently, the industry employs approximately 1,600 individuals in over 30 member firms.

This important event takes place on **April 10, 2018**. Consulting engineers and guests will gather at the *The Metropolitan Entertainment Centre - 281 Donald Street* to attend the 19th annual Manitoba Awards of Excellence in Consulting Engineering to celebrate the outstanding work of Manitoba's consulting engineers over the past 40 years!

Joining in partnership with ACEC-MB for this event will help to strengthen the provincial and the regional economy by celebrating the challenging and diverse projects that take place in our own City and Province. Sponsors and benefactors will demonstrate their support in the areas of technological development, environmental sustainability, growth, innovation, and infrastructure improvement.

We invite you to consider one of the sponsorship opportunities listed below; and join us in honouring and celebrating consulting engineering in Manitoba and help us celebrate this milestone year.
